

GLYCINE HYDROCHLORIDE

BASIC INFORMATION

Synonyms	Glycocoll Hydrochloride
CAS Number	6000-43-7
Chemical Formula	$C_2H_6ClNO_2$
Molecular Weight	111.53

COMPOSITION

Appearance	White crystalline hygroscopic powder
Assay (As $C_2H_6ClNO_2$)	Minimum 98.0 % on Dry Basis
Solubility	Soluble in Water; the solution is clear & colourless
Melting Point	175° C to 178° C

MAXIMUM LIMITS OF IMPURITIES

Loss on Drying (105° – 2 Hrs)	1.0 %
Residue on Ignition	0.1%
Sulphate (SO ₄)	0.01%
Heavy Metals	0.002%

PACKING

50 kgs Drum with Inside polythene liner .

Given above are our standard specifications. In case you have any additional requirements or have a more stringent limits of above parameters or for any other information contact
