

AMMONIUM ACETATE

BASIC INFORMATION

Synonyms	Acetic acid Ammonium Salt
CAS Number	631-61-8
Chemical Formula	CH ₃ COONH ₄
Molecular Weight	77.08

COMPOSITION

Appearance	White Deliquescent Crystals or Crystalline Masses
Assay (As CH ₃ COONH ₄)	Minimum 97% & Maximum 102% on Dry Basis by Titrimetry
Solubility	Freely soluble in water and Methanol
pH	6.5 to 7.5
Identification Test for Ammonium	Test Passes
Identification Test for Acetate	Test Passes

MAXIMUM LIMITS OF IMPURITIES

Moisture	2 % by Karl Fischer
Insoluble Matter	Max 0.1%

PACKING

25 / 50 kg Bags With Inside Polythene Liner

Given above are our standard specifications. In case you have any additional requirements or have a more stringent limits of above parameters or for any other information contact
